

Dear Sirs and Madams,

I wanted to express my support for XM Radio. I subscribe to it and find it to be a useful source of both music that taylor's to my taste and also for news and discussion. I travel 40 miles each direction to work and often listen to CNN and FOXNews on XM. However, one of the most important sources that XM offers is local weather and traffic. Every two to three minutes I can get an update on my traffic. Local radio stations cover traffic every 10 minutes if I'm lucky.

Please allow XM to continue providing local information. Please reject the NAB's petition 04-160. Thank you.

Sincerely,

Marc Bollon
